Over half of the 2,400 acres that make up The Isles of Collier Preserve are dedicated to lakes, nature preserves, and natural habitat that can be experienced first-hand through the miles of hiking, biking, kayaking trails and sidewalks that are integrated throughout the community.

Residents can immerse themselves in the pristine Florida natural habitat with many unique nature trails equipped with exercise stations. The Cypress Waterway East and West trails carry you along the Cypress Waterway. Take in the gorgeous water views and catch the sunset at one of three scenic nature watch areas.

Enjoy a peaceful glide through our Bluegill Kayak Trail and paddle back to the The Isles of Collier Preserve Overlook Bar and Grill for a bite overlooking the water. It’s all here . . . enjoy everything this pristine natural setting has to offer.
